4. G SRIHA – AM.SC.U4CSE25268

1. Project Summary

1.1 Project Overview

The Trip Organizer System is a web-based application designed to help users explore and plan trips across multiple countries. The system provides detailed information about various countries, including tourist destinations, accommodation options, budget estimates, transportation facilities, and special attractions.

The application allows users to browse nearly 20 countries from the homepage. By selecting a country, users can view all relevant travel-related details in an organized and user-friendly manner. This platform aims to simplify trip planning and enhance user experience by providing all necessary information in one place.

1.2 Project Scope

The web application provides a platform where users can explore different countries and access detailed travel information.

Features included in the system:

- Display of multiple countries on the homepage
- Clickable country selection
- Detailed country information including:
 - Tourist Places
 - Accommodation
 - Budget Details
 - Transportation
 - Special Attractions
 - Additional Information
- Display of images for each country

The system focuses on providing an intuitive interface for easy navigation and quick access to travel-related content.

2. General Description

2.1 Product Functions Overview

The main functions of the Trip Organizer system include:

1. Display a list of countries on the homepage
2. Allow users to select a country
3. Show detailed travel information for the selected country
4. Provide categorized information for better understanding
5. Display images related to the country and its attractions

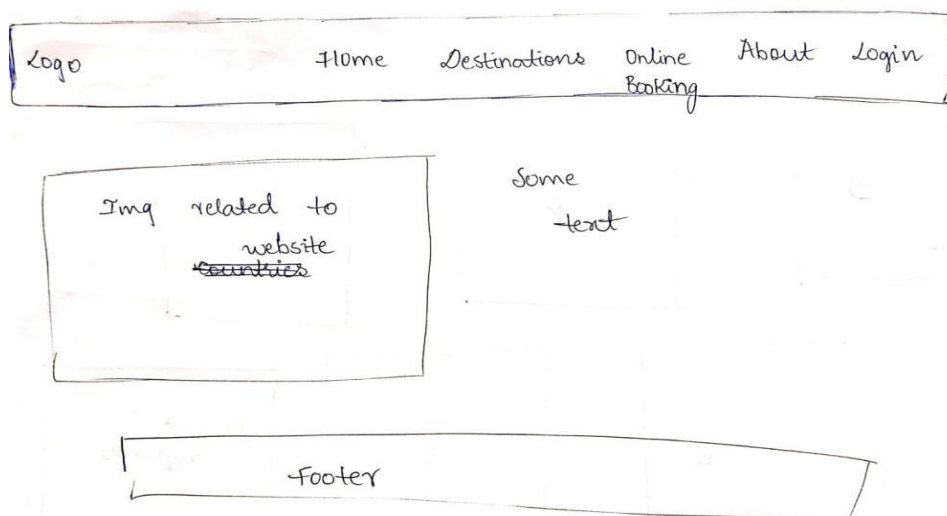

Types of Users/Actors

1. Guest User: Can explore available countries and view general travel information.
2. Registered User: Can log in, plan trips, and make bookings using the system.
3. Admin: Can manage country data, update travel information, and maintain the system content.

2.2 User Interface Design

- About Page

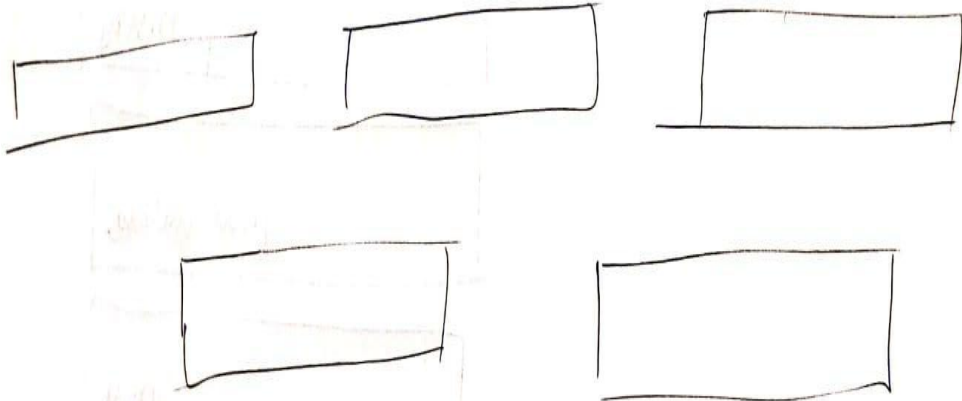

About us

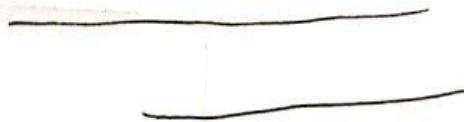

Text

Six horizontal lines drawn for text input.

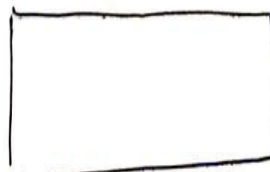

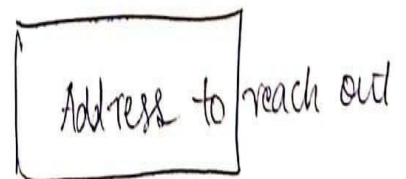

our features

Five hand-drawn rectangular boxes arranged in two rows: three in the top row and two in the bottom row.

our goal

Two horizontal lines drawn for text input.

Contact Details

A hand-drawn rectangular box.A hand-drawn rectangular box with the text "Address to reach out" written inside it.

- **Login Page**

Hand-drawn sketch of a login page. The page has a title 'Login page' at the top left. Below it are four input fields stacked vertically, labeled 'Name', 'mail', 'confirm mail', and 'Password'. To the right of the 'Password' field is a link that says 'forgot password?'. At the bottom is a button labeled 'Login ->'.

- **Country Details Page**

- Organized into sections for better readability:

- Tourist Places
- Accommodation
- Budget Details
- Transportation

- Special Attractions
- Use of headings, icons, and bullet points
- Image gallery for visual understanding
- Scrollable layout for smooth browsing

- **Design Principles Used**

- Consistency in colours and fonts
- Responsive design (works on mobile and laptop)
- Minimal clutter for better user focus
- Clear section separation using spacing and boxes

This design ensures that users can easily find information and enjoy exploring travel destinations.

2.3 Link to the Developer's Website

This project will be included in the developer's personal portfolio website to showcase skills in front-end development and UI design.
